- Meets IAPE & CALEA Property Management Standards & Rules
- Annual Update & Technical Support Contract Included Free for the First Year

PMI EVIDENCE TRACKER™

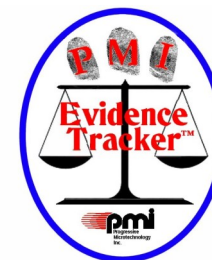

Easy to Use with a Cop Friendly Design

**One System.
One Price.
Total Success!**

For Smaller to Medium Size Law Enforcement Agencies with High Standards

Designed and Tested with the Assistance of an Accredited Police Department

Committed to Our Officers

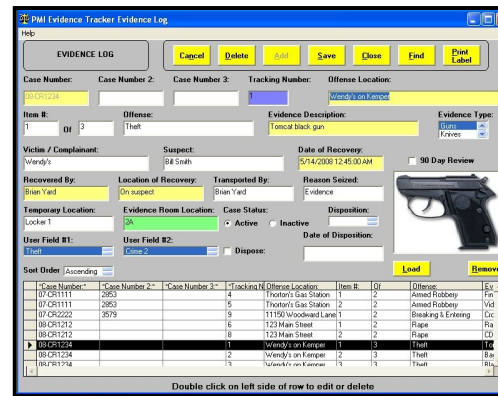

The **PMI Evidence Tracker™** is a powerful evidence management tool that was developed with specific law enforcement agencies in mind; departments who tend to be small to medium in size and do not have the big dollar budgets that large departments have, but still want to maintain a professional operation. The program was designed by Cops for Cops to dramatically reduce their workload by providing an automated control system for managing evidence and property.

Tired of handwritten logbooks? How would you like to process evidence in minutes by using one input screen with an auto-fill feature? How would you like to conduct an audit in hours instead of days or weeks? Well, the **PMI Evidence Tracker™** has the features that can help you do exactly that. Our powerful management system is a full turn-key evidence tracking system specifically created to automate the control of evidence and police department equipment.

**One System.
One Price.
Total Success!**

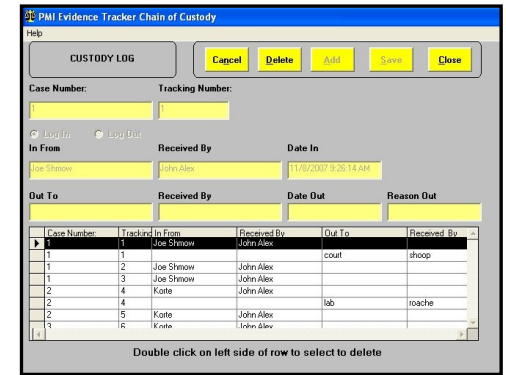

The key to the program is the use of barcode technology to manage and track evidence and department assets saving you a great deal of time and effort. Imagine scanning barcodes instead of handwriting or typing information in order to retrieve records or process items in and out of your property room.

In our newest edition, we've included an Activity Log that reports changes made in the program by each individual. We also include two user-defined fields that can be customized, an evidence type category, a 90-day evidence review box and the ability to upload a photograph for quick reference.

Evidence Log

Affordable and easy to use, yet powerful enough to keep detailed information about each piece of evidence, our **PMI Evidence Tracker™** provides a simple solution to a complex time consuming problem. It enables you to accurately track the movement of each piece of evidence in and out of the property room and makes it easy to dispose of items that are no longer needed. Our single input screen with an auto-fill feature allows you to enter evidence fast.

Chain of Custody

The moment you login to the program you will see how simple and **COP FRIENDLY** it is to use. You will be surprised how quickly you and your officers will adapt to this versatile time saving tool for managing all your evidence, property and equipment.

Currently, we offer three packages for your convenience, starting at the extremely low price of **\$3850**. Included in all of our packages is our **PMI Evidence Tracker™** software, our **PMI Lite™** barcode labeling software, a site license, a barcode scanner, a label printer with cable, one Evidence Label Kit, one Asset Label Kit, our annual update and technical service agreement and free shipping. You receive everything you need to assemble, install and start entering data the same day.

If you are ready to take the step forward and gain control of your property, contact us...
